## **DETAILED OFFICE ACTION**

## Allowable Subject Matter

Claims 1 and 3-42 are allowed.

## Reason for Allowability

The following is an examiner's statement of reasons for allowance: in combination with other limitations recited in the claims, the primary reason for the allowance is the including the following inventive features of

A stator core having the a plurality of substantially axially extending stator slots circumferentially spaced in said core body, said stator slots defining intervening teeth projecting substantially radially towards said core main peripheral surface; each of said stator slots extending radially from a corresponding slot base to said core main peripheral surface; wherein each of said stator slots defines a slot first section extending radially from said slot base to a slot intermediate radial position located intermediate said slot base and said core main peripheral surface; a slot second section extending radially from substantially adjacent said slot intermediate radial position towards said core main peripheral surface; said slot first and second sections communicating with each other and being in a circumferentially offset relationship relative to each other.

Comparing to the prior-art of the record, the Examiner agrees with the applicant's remark that Berger (USP 5637943) discloses the rotor core with circumferentially shifted slots for the conductor bars to prevent the conductor bars from shifting off their positions while cooling after being casted into the slot. This is different from the present invention's slot portion circumferentially offset to accommodate the winding therein. Furthermore, comparing the prior art, the cited refs discloses slot having two different portions, one is bigger than the other, instead of having two slot portions being circumferentially offset. Thus, none of the prior art references of the record, either stand-alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Application/Control Number: 10/722,687

Art Unit: 2834

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tran N. Nguyen whose telephone number is (571) 272-2030. The examiner can normally be reached on M-F 7:00AM-4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571)-272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
